

Volunteers for Clinical Research Needed

# Bacteriophage Therapy

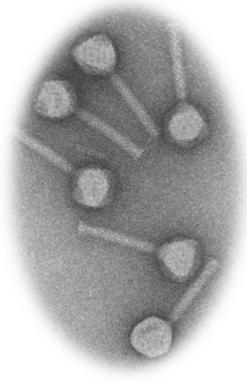

Cystic Fibrosis ♦ *Pseudomonas aeruginosa* ♦ Chronic Infection

A novel drug class

is being explored: Natural Bacteriophage

## What are bacteriophages?

Phages are natural predators that only attack specific bacteria, like *Pseudomonas*, and do not infect human cells

Phages in this study will be administered by nebulizer and you can stay on your usual medications

**Helps us advance research for chronic pulmonary infections**

To potentially qualify for this study, you must:

- Be at least 18 years of age
- Have Cystic Fibrosis
- Have a history of *Pseudomonas aeruginosa* lung infection

All study-related care and study-related assessments will be provided at no cost. Reimbursement for study-related time and travel may be provided.
